Dear Hiring Manager,

I'm excited to be applying for the Software Engineer position at Ballotpedia. As someone who is highly focused and attentive to detail, I thrive on building quality systems that surpass end users' expectations. I'm thrilled at the opportunity to show off my technical expertise and leadership skills at Ballotpedia.

In my current role at Andela, I was fortunate to work for several teams both internally, within Andela, and externally,for our clients. Our team was tasked with the development & maintenance of our Information System for Andela. This gave me a nice experience to nurture and develop my technical and leadership skills. I was apply the skills acquired to maintain and develop our client's system, A system to upload multimedia content to music platforms and manage artist Royalties.

I am also attentive to the need for continued process improvements. When we faced repeated deadline delays due to Quality Assurance challenges, I proposed and carried out the implementation of an automated bug tracking system to identify potential issues earlier in the development cycle. This resulted in fewer bugs reported by our users.

Thank you for your time and consideration. I'm looking forward to learning more details about the Software Engineer position at Ballotpedia. I'm excited about the opportunity to leverage my unique range of skills, and I'm eager to demonstrate my commitment to developing world-class software solutions for Ballotpedia.

Sincerely,
Josiah Mokobo Nyarega
